

Dear Valued Customer,

Field Fresh Foods has been actively following the developments of the Centers for Disease Control (CDC) and the Food and Drug Administration (FDA) in regards to the public advisory on a potential E. coli 0157-H7 outbreak in Romaine lettuce.

At this time, the FDA has cleared the use of Romaine harvested outside of the California Central Coast growing regions. Field Fresh Foods will begin sourcing Romaine from the Yuma growing region and processing for deliveries beginning Thursday night.

As per the FDA's recommendation, Field Fresh Foods will include the growing region and harvest date on all labels for product containing Romaine during the ongoing investigation.

Field Fresh Foods will continue to monitor the situation and will keep you informed of any relevant changes or important developments.

Sincerely
Daniel Lozada
